Applicants bring to the attention of the Examiner Patent Interference No. 105,595 McK and Patent Interference No. 105,596 McK. Those interferences were declared in a Declaration dated November 21, 2007, which involved Applicants' US Application No. 10/508,675 (published copy submitted herewith) and Boehringer Ingelheim's U.S. Patent No. 6,924,285 (submitted herewith) and its divisional application, U.S. Application No. 11/083,247 (published as US 2005-0182043, submitted herewith). On June 17, 2008, in response to Applicants' Request for Adverse Decision, judgment on priority on all Counts was awarded to Boehringer Ingelheim and the corresponding claims of Applicants' involved application were finally refused. A copy of that Decision is submitted herewith.

Applicants believe that the presently claimed compounds are patentable over the subject matter of the lost Counts of Interference No. 105,595 and No. 105,596.

Applicants respectfully request that the Examiner consider the listed documents and indicate that they were considered by making appropriate notations on the attached form.

If the Examiner applies any of the documents as prior art against any claim in the application and Applicants determine that the cited documents do not constitute "prior art" under United States law, Applicants reserve the right to present to the Office the relevant facts and law regarding the appropriate status of such documents.

Applicants further reserve the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should any of the documents be applied against the claims of the present application.

If there is any fee due in connection with the filing of this Statement, please charge the fee to our Deposit Account No. 06-0916.

Respectfully submitted,
